

ANGLEPOISE®

2019 / 2020
Catalogue

Family and company are emotive words for us. This small company is a family business with a heritage to live up to and a future that must grow from the core.

Our best-known 1930s Original 1227™ design puts function first and endures as our signature product. Putting light where it's needed is what we do best and remains our primary focus. With its classic shade shape and extended applications, our heritage Original Range is now an all-encompassing offer, while our modernist Type Range performs just as well for those who prefer a contemporary aesthetic.

Times are changing and we must change too. Some live in micro homes, others live in lofts. Open workspaces are now the norm and many of us work from home. Gardens and terraces have become premium living spaces, furnished just like our interiors. So, we've created an extended range of triple scale Giant lights including lights for outdoors, also ranges of Mini lights down-scaled to two-thirds their original size. And last Autumn we scaled down even further when we launched our first USB powered 90 Mini light, a half-scale iteration of a design from our archive.

And that's not all. Later in 2019 we launched a smart new colour with designer Margaret Howell, launched a fourth collaboration with Paul Smith that's inspired by the Land Rover Defender, and introduced the all-new Sir Kenneth Grange-designed Type 80™ collection.

Simon Terry & John Purnell
Managing Directors

About Us

In 1932, when vehicle suspension engineer George Carwardine invented a spring, crank and lever mechanism that could be positioned with the lightest of touch yet would maintain its position once released, a blueprint for the first Anglepoise task lamp was born. The Anglepoise lamp has subsequently achieved iconic status and its engaging, anthropomorphic form is recognised and admired the world over.

In subsequent years the original lamp design has evolved under the careful watch of the founding Terry family without ever losing sight of its primary function and unique, characterful form. From the creation of the classic Original 1227™ lamp and the development of extended Original Range collections to the introduction of modernist Type Range collections designed by Sir Kenneth Grange. Incomparable British design remains at the heart of our dynamic British brand.

With ongoing collaborations with designers Margaret Howell and Paul Smith and the new Sir Kenneth Grange Type 80™ collection, there's much to look forward to. We're proud that Anglepoise lighting can now be found in homes and workplaces, restaurants, bars and hotels in more than 50 countries worldwide.

@Anglepoise

2009: Royal Mail stamp collection issued to celebrate British Design Classics, includes iconic Anglepoise® Original 1227™ design.

New Collections

We're pleased to introduce two new collections to the growing Anglepoise Type Range.

The Type 80™ collection is an all-new design by renowned British industrial product designer Sir Kenneth Grange in his 90th year. The collection features Table, Wall and Ceiling options in four colours.

The Anglepoise + Paul Smith collaboration has also grown; designer Paul Smith revisits a unique patchwork colour scheme previously created for a unique version of the Land Rover Defender. Edition Four features 3 sizes: Mini, Standard and an all-new Floor Lamp.

Type 80™ Table Lamp
Rose Pink

Type 80™ Collection

Anglepoise is pleased to introduce a new, contemporary lighting collection designed by renowned British industrial product designer Sir Kenneth Grange in his 90th year.

Offering a premium lighting solution for both domestic and commercial interiors, the collection includes lights for table, wall and ceiling that combine high style with ease of installation and durability.

“In the history of domestic lighting there is one truly iconic element and it must surely be the conical shade, so is right that Anglepoise should have such a classic iconic design in their portfolio. Moreover, with every new model that we launch there is an innovation, no matter how modest. With the Type 80™ the visual attraction of light spilling onto the shade outer surface aims to make the iconic even more distinguished.”

— Sir Kenneth Grange

Type 80™ Wall Light
Pistachio Green

Designed by Sir Kenneth Grange

Distinguished by a striking, graphic profile, Type 80's design is enhanced by an attractive 'halo' light-escape feature in the shade. This adds an extra dimension in low light environments - a refinement characteristic of Sir Kenneth's designs for the brand.

Every detail has been carefully considered and precision engineered to deliver streamlined style, ease of use and consistency across the collection.

Anglepoise® + Paul Smith - Edition Four

In his latest collaboration with Anglepoise, designer Paul Smith revisits a unique patchwork colour scheme previously created for a unique version of the Land Rover Defender. The palette now becomes the inspiration for another classic British design, the Type 75™ lighting collection created for Anglepoise by renowned British industrial product designer, Sir Kenneth Grange.

Paul's original 27-colour palette alluded to the Defender's past as a multi-purpose utilitarian workhorse, with reference to its use on the farmyard and in the emergency services.

In his Edition Four palette, British countryside colours dominate: deep, earthy burgundy, leaden grey, sky blue, dappled green and rich clay. Just a dash of fluorescent yellow adds that element of surprise we have come to expect from a designer renowned for his mastery of colour.

Type 75™ Mini Desk Lamp
Anglepoise + Paul Smith - Edition Four

Designed by Sir Kenneth Grange

Anglepoise + Paul Smith Edition Four comprises a Type 75™ desk lamp in standard and Mini sizes, also a Type 75™ floor lamp, which is included for the first time in the Anglepoise + Paul Smith collection.

Original Range

Described as 'the lamp with a mind and a body' (Financial Times), one of '12 designs that changed everything' (Wired) and the epitome of 'Cool Britannia' (Elle Decoration), our Original 1227™ desk lamp, designed by George Carwardine in the 1930s, set the standard by which other task lights are measured and today is considered iconic. The lamp is still in production to this day and remains one of our most popular designs.

Collections:

Type Range

Designed by esteemed British industrial designer Sir Kenneth Grange, our Type Range reinterprets the original Anglepoise design for the 21st Century.

Clean lines, full flowing movement and flawless balance have made both Type 75™ and Type 1228™ collections firm favourites with the design cognoscenti.

“The Anglepoise is a minor miracle of balance – a quality in life that we do not value as we should.”

— Sir Kenneth Grange

90 Mini Mini

Offspring of the ever-popular 1970s Model 90, our 90 Mini Mini lamp has all the versatility and personality of a classic Anglepoise lamp wrapped up in its tiny form. At half the size of a standard desk lamp it fits just about anywhere you can think of: in your home, at your student digs, or right beside you as you work, relax or play.

Compact and cute as it is, 90 Mini Mini is also a serious piece of kit that puts light right where you need it. Put this hyper-flexible little light into any position and you can rest assured it will stay.

Featuring a long-life, dimmable, low-energy LED module integrated into the shade, 90 Mini Mini is our first USB powered Anglepoise light. Take it wherever you need it. To power on simply plug into a laptop, a portable battery, or into the supplied adapter plug.

Designer Paul Smith demonstrates his mastery of colour in this 10-piece Type 75™ collection. The collection includes both a Type 75™ and Type 75™ Mini Desk Lamp, each in four exciting colour Editions; also a new Type 75™ Floor Lamp in Edition Four colours, plus a mighty Type 75™ Giant Lamp in the bright pastel colour palette of the first Edition.

"Following the success of our previous collaborations with Anglepoise, I thought it would be nice to add two extremes: the Mini and the Giant! The giant one is pretty extraordinary and in a big space looks sensational, whilst the mini is perfect for studies or for students working in smaller spaces."

Anglepoise and Margaret Howell renewed their collaboration by introducing a smart Sienna Edition into the best-selling Type 75™ collection designed by Sir Kenneth Grange.

The rich, clay colour chosen by Margaret adds a new dimension to the Margaret Howell colour palette and acts as the perfect complement to existing Yellow Ochre and Saxon Blue editions. Floor standing Type 75™ lamps in all three colours are also introduced to extend the high functionality of this stylish collection.

"My choice of Sienna for our new Anglepoise lamp may have been influenced by having recently worked on the Autumn Winter clothing collections. We chose fabrics in rich rusts and warm browns. Sienna, a deep burnt orange, is a strong colour and I think sits well against pale grey and neutral walls."

— Margaret Howell
